COLD STORAGE REPORT AS OF AUGUST 1, 1939

The into-storage movement of dairy products and eggs during July continued as in the past months at a less than average rate. The net increase in creamery butter stocks was 33,485,000 pounds. Commercial stocks were increased by 39,629,000 pounds. Dairy Products Marketing Association stocks were reduced by 868,000 and Federal Surplus Commodities Corporation and relief stocks by 5,276,000 pounds. The July movement this year compares with a net into-storage movement last year of 51,790,000 pounds and a 5-year (1934-38) average of 42,763,000 pounds.

Holdings of all varieties of cheese were increased during July by 20,441,000 pounds. The net increase a year ago for the same period was 19,563,000 and the 5-year average increase 16,471,000 pounds.

August 1, the normal peak point of accumulation of egg stocks, showed 7,017,000 cases of shell eggs and 143,021,000 pounds of frozen egg meats on hand. These quantities compare with 6,411,000 cases of shell and 135,329,000 pounds of frozen eggs on August 1 a year ago and 7,874,000 cases and 131,106,000 pounds of frozen for the 5-year average. The total case equivalent for August 1 this year was 11,103,000 and compares with 10,278,000 cases a year ago and the 5-year average of 11,620,000 cases.

Stocks of frozen fruits, quick-frozen and cold-packed, were increased during July by 26,540,000 pounds. A year ago during the same period the increase was 27,549,000 pounds.

Frozen vegetable stocks were increased by 8,885,000 pounds. This quantity compares with 12,270,000 pounds for July 1938.

Stocks of frozen poultry were reduced during July by 2,332,000 pounds. This compares with reductions of 792,000 pounds during July last year and 650,000 for the 5-year average.

Total stocks of frozen and cured meats were reduced by 41,387,000 pounds. This quantity compares with a reduction of 37,841,000 pounds for the same period a year ago and 39,059,000 for the 5-year average. August 1 stocks were 81,603,000 heavier than on August 1, 1938, but 12,822,000 pounds below the 5-year average.

FRUITS AND VEGETABLES

FROZEN FRUITS

Total stocks of all frozen fruits on August 1 were reported as 130,650,000 pounds, an increase over July 1 of 26,540,000 pounds. Of the August 1 holdings 21,172,000 were reported as unclassified. Reports indicate that 32,196,000 pounds were in small containers of less than 30 pounds capacity and 98,454,000 pounds were in bulk or containers of 30 pounds and over.

FROZEN VEGETABLES

Stocks of frozen vegetables were increased during July by 8,885,000 pounds. Holdings on August 1, 1939, exceeded those of a year ago by 17,175,000 pounds. Of the total quantity reported on hand, 3,938,000 were unclassified as to variety. Most varieties of vegetables showed a reduction in stocks during the month, exceptions being snap beans and peas, which showed increases of 2,117,000 pounds and 7,930,000 pounds, respectively.

Contents of August 1 Cold Storage Report

Separate tables appearing in this report show United States stocks on hand on August 1, this year compared with previous periods, for the following groups of commodities:

Fruits and Vegetables, Frozen, page 3;

Dairy and Poultry Products, page 4;

Meats (cured and frozen) and Lard, page 5.

Special tables of cold storage holdings are included for frozen fruits, by container-size, page 3; cream, butter, American cheese, eggs and poultry, by States, page 6; and August 1, 1939, data for all commodities, by geographic regions, pages 7 and 8.

Creamery butter stocks increased by 33,485,000 pounds during July. Commercial stocks were increased by 39,629,000 pounds, but Dairy Products Marketing Association holdings were reduced by 868,000 and Federal Surplus Commodities Corporation and relief holdings by 5,276,000 pounds. Total stocks of butter were less than those of August 1 a year ago by 8,163,000 pounds but in excess of the August 1 (1934-38) 5-year average by 33,343,000 pounds. With the exception of August 1, 1938, butter stocks were the heaviest August 1 holdings on record.

Stocks of American cheese were increased by 17,917,000 pounds during July. Total stocks of all varieties of cheese were 15,060,000 pounds less than on August 1 last year but 7,189,000 more than the 5-year average.

Into-storage movement of eggs totaled 40,000 cases of shell and 1,565,000 pounds of frozen egg meats, or a total case equivalent of 84,000. The into-storage movement during July 1938 totaled 66,000 cases and the 5-year average 284,000. Total stocks of both shell and frozen eggs reduced to a case equivalent basis were greater than on August 1, 1938, by 825,000 cases but less than the 5-year average by 517,000 cases.

A net out-of-storage movement of frozen poultry occurred during July. The out-movement totaled 2,332,000 pounds. During July 1938 a similar movement totaled 792,000 pounds. The 5-year average seasonal withdrawals were 650,000 pounds.

August 1, 1939, Cold Storage Report

Page #5

MEATS AND LARD

Stocks of all frozen and cured meats, which totaled 559,000,000 pounds on August 1, were 82,000,000 pounds heavier than those of a year earlier but 13,000,000 below the 5-year (1934-38) average.

An insignificant change occurred in frozen and cured beef stocks from July 1. August 1 holdings were 2,434,000 pounds below those of a year earlier and nearly 15,000,000 below the 5-year average.

Frozen and cured pork stocks, totaling 455,000,000 pounds, were 76,000,000 above those of August 1, 1938, but 5,000,000 pounds less than the 5-year average for August 1.

Stocks of lard were decreased during July by 8,436,000 pounds and were 16,000,000 pounds in excess of those of August 1, 1938, and 5,000,000 above the 5-year average.

Although total stocks of meats were within 13,000,000 pounds of the recent 5-year average, they were well below those prior to 1935. The 10-year average (1929-38) is 708,808,000 pounds.
